EF

# Eugene Fureev

Software Architect · Tech Lead · Team Lead

Limassol, Cyprus

English B1/B2 · Russian native

POSITION

## I design distributed systems and take them to production — together with the team, the docs and a process that outlives me on the project.

Microservices, CQRS, outbox, realtime and more... PHP, Go and TypeScript — the language follows the service boundary, not the other way round.

| 19 | 10 | 20+ | 57 |

| years building software, since 2007 | of them as a lead and an architect | people in the teams I ran | open source repositories |

EXPERIENCE

**2022 — now** — Team Lead · Go / PHP / TS

Under NDA · betting · Limassol

- Architecture: microservices, distributed, CQRS, outbox, multi-kernel, SSR, realtime
- Infrastructure services in Go, business domain in PHP and TypeScript
- C4, ADR and SLA as part of the definition of done
- Load, stress and mutation testing in CI; Prometheus, OpenTracing, Sentry, ELK
- Hiring, growth plans, performance reviews, code review

**2016 — 2022** — Software Architect · Tech Lead

Sitesoft · portals for federal agencies

- Designed a no-code/low-code portal platform: multi-site, multi-language, plugin architecture
- Portals of the Ministry of Defence, the Ministry of Internal Affairs, RosTransNadzor, Rosneft
- Built CI/CD for PHP, Go and JS; introduced continuous testing and mandatory cross-review
- Ran back-end, front-end, QA and analytics teams; interviews and growth plans

**2016** — Tech Lead · Architect

Perina Peroni / MilaDoma · retail

- Moved three of the company stores onto a single platform
- Split the monolith into services and designed the new database structure

**2015 — 2016** — PHP / JS developer

AFC · credit scoring platform

- Scoring platform for microfinance organisations
- Drivers for third-party scoring services, encryption, authorisation, open data

**2013 — 2015** — PHP / JS developer

E96.ru · federal marketplace

- First high-load experience and first large distributed team
- Day-to-day work inside a very large legacy monolith

**2007 — 2015** — Founder · developer

Feugene Group

- Own CMS built from scratch (PHP, JS, MySQL)
- Multithreaded aggregator of state contracts (Delphi)
- Production administration, client work, setting tasks for designers and developers

## STACK

| | |
|---|---|
| PHP 7 / 8 | very high |
| Architecture | high |
| CI/CD | high |
| JavaScript / TypeScript | above medium |
| Team management | above medium |
| Go | medium |

Laravel / Symfony · Swoole · Vue 3 · PostgreSQL · Kafka · RabbitMQ · Kubernetes · Terraform · ELK · Prometheus

## OPEN SOURCE

github.com/efureev

| | | |
|---|---|---|
| granularity | Vue 3 design system: 85 core components, own CSS pipeline | TypeScript |
| laravel-trees | Multi-tree structures for Laravel | PHP |
| fint-i18n | Localization for Vue 3: lazy-loaded blocks, template compilation, plugins | TypeScript |
| go-outbox | Transactional outbox dispatcher: a sidecar to RabbitMQ and Kafka, loses nothing | Go |
