ABOUT AUTHOR:

Joseph Thachil George is a Technical Consultant for International Game Technology (IGT), Rome, Italy. Additionally, Joseph is pursuing doctorate (PhD) in Computer Science and Engineering at the University of Lisbon, Portugal. He has completed M. S in Cyber Security from the Università degli Studi di Firenze, Italy. In addition, he is also part of the research group (DISIA) of the University of Florence, Italy, and the research group (INESC-ID Lisbon) of the University of Lisbon, Portugal.

His research interests cover Dynamic Malware Analysis, Blockchain technology- Hyperledger fabric, and cyber security. He published five books *Cybercrime and Social Media Relationships*, *Designing Distributed Systems* , *Social Network Analysis* ,*Test Driven Development for Java Developers* and ,*Network Security Management* respectively. In IGT he is been a part of various project related to game configuration and integration in various platform. Specialized in Java and spring boot-based projects.

He has also worked in various companies in India, Angola, Portugal, and UK. In total he has seven years of experience in various IT companies.

CONTENTS

1 INTRODUCTION 6

2 PYTHON ON WINDOWS 7
- 2.1 Install Python 7
- 2.2 Install PyCharm 8
- 2.3 How to use PyCharm 8
- 2.4 Writing and running your first Python Program 9
- 2.5 Python Variables 9
- 2.6 Data type 10
- 2.7 Python Strings 10
- 2.8 Python Operators 11
- 2.9 Python Lists 11

3 MORE ON PYTHON PROGRAMMING- PART 1 12
- 3.1 Python Tuples 12
- 3.2 Mutable List vs Immutable Tuples 13
- 3.3 Python Sets 13
- 3.4 Python Dictionaries 14

4 MORE ON PYTHON PROGRAMMING- PART 2 15
- 4.1 Python If ... Else 15
  - 4.1.1 if-elif-else 15
- 4.2 Python While Loops 17
- 4.3 Python For Loops 18
- 4.4 Python Functions 19
  - 4.4.1 Python Function Return Value 19
- 4.5 Python Arrays 20
- 4.6 Python Classes and Objects 20
  - 4.6.1 The _init_() Function 20
- 4.7 Python Inheritance 21
- 4.8 Python PIP 25
- 4.9 Python NumPy 25
  - 4.9.1 Create a NumPy ndarray Object 25

5 SAMPLE PROJECTS USING PYTHON 27
- 5.1 Consultant Management System 27
- 5.2 Calculator-Project 30
- 5.3 Media Player-Project 35
- 5.4 Shutdown Operating System- Project 37

6 PYTHON-DATABASE CONNECTIVITY 39
6.1 Python- Oracle: 39
6.1.1 Connection Information 40
6.1.2 Using Python cx_Oracle with Oracle Database 40
6.1.3 Closing connections 41
6.2 Oracle database operations using Python 41
6.3 Python- MySQL 43
6.3.1 Python MySQL-Example 43
6.4 Python- PostgreSQL 45
6.4.1 Create a new database 45
6.4.2 PostgreSQL table using Python 46
6.5 Python- MongoDB 47
6.5.1 Establishing a Connection 47
6.5.2 MongoDB Example 48
7 PYTHON IN VISUAL STUDIO CODE 50
7.1 Install Python and the Python extension 50
7.1.1 Install Visual Studio Code and the Python Extension 50
7.1.2 Run Python code 51
8 DJANGO WEB FRAMEWORK 52
8.1 Introduction to Django 52
8.2 Django code 52
8.3 How does Django work 53
9 WEB APPLICATION- VISUAL STUDIO CODE + PYTHON+DJANGO+BOOTSTRAP+HTML+SQLITE 55
9.1 Project - Super Market Web Application 55
9.1.1 Database Connectivity -SQLite 55
10 PYTHON- FLASK 65
10.1 Application Setup 65
10.1.1 The Application Factory 65
10.1.2 Run The Application 67
10.2 Define and Access the Database 68
10.2.1 Connect to the Database 68
10.2.2 Create the Tables 70
10.2.3 Register with the Application 71
10.2.4 Initialize the Database File 72
11 REST FRAMEWORK PYTHON- DJANGO 73
11.1 DRF Setup 73
11.2 RESTful Structure 74

11.2.1 Update Views 75
11.2.2 Update URLs 76
11.3 Refactor for REST 76
11.3.1 GET 76
11.3.2 Datetime Format 77
11.3.3 POST 78
11.3.4 Delete 79
12 REST FRAMEWORK PYTHON- FLASK 81
12.1 What Flask Does 81
12.2 Creating the API 82
12.3 Connecting Our API to a Database 84
13 RESTFUL WEB SERVICES IN DJANGO- EXAMPLE-1 87
14 RESTFUL WEB SERVICES IN DJANGO- EXAMPLE-2 93
15 API INTEGRATION 104
16 API INTEGRATION-EXAMPLE-1 108
17 API INTEGRATION-EXAMPLE-2 110
18 CONCLUSION 115
